

## Quiz Questions

## Safe Forklift Operation

Name: \_\_\_\_\_ Date: \_\_\_\_\_

|   |
|---|
| <b>1.</b> Forklift operator training is required before anyone can operate a forklift.                        |
| <input type="radio"/> True  |
| <input type="radio"/> False   |
| <b>2.</b> For safe operation of a forklift that is carrying a load, the center of gravity must be outside the |
| <input type="radio"/> stability triangle.   |
| <input type="radio"/> True  |
| <b>3.</b> The impact of a forklift colliding with other objects is:   |
| <input type="radio"/> Less than colliding with a car  |
| <input type="radio"/> Greater than colliding with a car   |
| <input type="radio"/> About the same as colliding with a car  |
| <input type="radio"/> Negligible  |
| <b>4.</b> What is most likely to cause a tipover?   |
| <input type="radio"/> Stopping slowly with a capacity load  |
| <input type="radio"/> Turning a corner with an unbalanced load  |
| <input type="radio"/> Traveling at a slow speed   |
| <input type="radio"/> Carrying a load low across the floor  |
| <b>5.</b> An attachment added to a forklift could reduce the load capacity.                                   |
| <input type="radio"/> True  |
| <input type="radio"/> False   |
| <b>6.</b> The pre-operational inspection is essential because:  |
| <input type="radio"/> You may get in trouble if it's not done   |
| <input type="radio"/> It verifies that the forklift is in safe operating condition                            |
| <input type="radio"/> The maintenance department needs work   |
| <input type="radio"/> It's not essential—the forklift is probably safe to use                                 |

|  |
|--|
| <b>7.</b> It is safe to stand under the raised forks as long as the forklift's brake is engaged. |
| <input type="radio"/> True   |
| <input type="radio"/> False  |
| <b>8.</b> In the event of a tipover, what should you do?   |
| <input type="radio"/> Try to jump clear  |
| <input type="radio"/> Stay seated, with seat belt fastened                                       |
| <input type="radio"/> Put your arm out to break the fall   |
| <input type="radio"/> Turn the wheel and hit the gas   |
| <b>9.</b> When loading a forklift, you must locate the center of gravity of the load.            |
| <input type="radio"/> True   |
| <input type="radio"/> False  |
| <b>10.</b> When operating a forklift on a loading dock, you must:                                |
| <input type="radio"/> Check the dock plate to make sure it's secure                              |
| <input type="radio"/> Drive the forklift into the trailer all the way                            |
| <input type="radio"/> Lift the trailer with the forks if it's too low                            |
| <input type="radio"/> Assume the truck driver is done backing in                                 |
